AMIGA

COMPENDIUM OF THIRD PARTY SOFTWARE AND HARDWARE SUPPORT
FOR THE AMIGA

AMIGA

AMIGA SOFTWARE

Developer: A-Squared Systems Group

Address: 7200 Sayre Drive, Oakland, CA 94611

Name of Program: The Amiga Eye

Publisher: Amiga

Program Type: Color Video Digitizer

Application: Digitizer of monochrome or color images.

Description: This software package comes with a digitizer "frame grabber"
device that plugs into the Amiga. After capturing an image,
it allows the user to vary hue, saturation and luminance as
well as brightness over the computer's range of 4,000
plus colors. User can record up to one second of imaging
and replay the recreated images in "instant replay," slow
motion, stop action or high speed modes.

Special Features: Interfaces with other paint programs and is
compatible with any NTSC device.

Availability: Upon Amiga introduction

AMIGA

FOR IMMEDIATE RELEASE

AMIGA SOFTWARE

Developer: The Arktronics Corporation

Address: 520 East Liberty St., Ann Arbor, MI 48104

Name of Program: Textcraft"

Publisher: Amiga

Program Type: Productivity

Application: Word processing

Target Audience: Small businesses and homes

Description: Textcraft is a "what you see is what you get"
word processing program. It offers a choice of up to
four type styles and three fonts, as well as up to
eight colors for text or background. Users can call-up
on screen menus as well as access six templates of
pre-formatted documents such as business letters,
resumes, etc.

Special Features: On-line tutorials and on-line help screen provide
easy and fast operation.

Availability: Upon Amiga introduction

◢AMIGA

FOR IMMEDIATE RELEASE

AMIGA SOFTWARE

Developer: Borland International

Address: 4585 Scotts Valley Drive, Scotts Valley, CA 95066

Name of Program: Turbo Pascal™

Publisher: Borland International

Program Type: Language

Application: Software systems and utilities development

Description: Turbo Pascal is a highspeed, single-pass, native code compiler with commented source code, run time error checking and full screen editor that utilizes word processor and spreadsheet type commands.

Special Features: The program has a one-step compile feature integrating linker with compiler for high-speed compilation. One keystroke will run and compile a program and provide fast results while eliminating the need to call a separate linker program. The editor is memory-mapped for more efficient file, block and page moves.

Turtle grahics are available for end users interested in learning fundamentals of developing graphics applications.

Multiple external machine language routines can reside in one file, providing users with the means to build their own application-specific library routines for personal use or for sale as commercial software products.

Availability: 1st quarter, 1986

AMIGA

AMIGA SOFTWARE

Developer: Broderbund Software

Address: 17 Paul Dr., San Rafael, CA 94903

Name of Program: The Print Shop"

Program Type: Creativity

Application: Printing

Target Audience: 8 years and up

Description: The Print Shop allows the user to print personalized greeting cards, invitations, letterheads, stationery, signs and banners. The program provides for different typestyles in multiple sizes and formats, dozens of pictures, symbols and borders. In addition, there's a graphic editor for creating designs. It also comes with a starter supply of brightly-colored pin-feed paper and matching envelopes.

Special Features: Allows user to preview signs, greeting cards and letters on screen before printing.

Availability: November 1985

FOR IMMEDIATE RELEASE

AMIGA SOFTWARE

Developer: Chang Laboratories, Inc.

Address: 5300 Stevens Creek Blvd., San Jose, CA 95129

Name of Program: RAGS to RICHES™ Ledger

Publisher: Amiga

Program Type: Productivity

Application: Accounting (general ledger)

Target Audience: Small business

Description: Double-entry general ledger provides a safeguard so
books are never out of balance. The program handles up
to 5,000 accounts/10,000 transactions and is RAM-based to
function twice as fast as any other accounting
package. CALC functions simplify calculating discounts,
taxes, surcharges. Can stand-alone or be integrated with
receivables, payables, sales modules. On-screen help
menus are provided as well as an editor for long memos on
accounts and transactions. Instant on-screen summaries
and a RAM-fast search for account name or account number
are provided.

- more -

Special Features: Tracks cash and credit sales; prints sales journal. Tracks cash, check, credit expenses; prints journals. Accomodates month-end accrual items. Handles posting to multiple accounts. Access to 96 most frequently used accounts by single key code. Complete audit trails. On-screen analysis of expenses and income accounts for current, month-to-date or year-to-date balances. Ready-made charts of accounts for various small businesses on diskette. Printed reports include income statement, balance sheet, audit trail report, transaction back-up report, account master list. Balance sheet and income statement reports formatted for presentation to bank or other financial institution.

Availability: August, 1985

AMIGA

AMIGA SOFTWARE

Developer: Chang Laboratories, Inc.

Address: 5300 Stevens Creek Blvd., San Jose, CA 95129

Name of Program: RAGS to RICHES" Payables

Publisher: Amiga

Program Type: Productivity

Application: Accounting (accounts payable)

Target Audience: Small business

Description: The accounts payable program handles up to 5,000
vendors/10,000 transactions. It is RAM-based to function
twice as fast as any other accounting package. A CALC
function simplifies calculating discounts, taxes,
surcharges. Can stand-alone or be integrated with
ledger, receivables, sales modules. On-screen help
menus as well as an editor for long memos on customers
and transactions. Instant on-screen summaries. It uses
a RAM-fast search for vendor name or vendor number.

- more -

Special Features: Posts or split-posts invoices by item. Handles
discounts, freight and taxes. Records late charges
and early payment discounts. Tracks partial or full
payments and deposits. Prints checks as scheduled.
Automatically handles credits and debits. Provides
instant aging by vendor. Access to 96 most
frequently used vendors by single key code. On-line
vendor follow-up. Prints 30-, 60-, 90-day aging.
Prints one check for multiple invoices. Prints
check register. Prints vendor list. Previews
checks to be printed. Prints check register.
Prints cash requirements report and check register report.

Availability: September, 1985

FOR IMMEDIATE RELEASE

AMIGA SOFTWARE

Developer: Chang Laboratories, Inc.

Address: 5300 Stevens Creek Blvd., San Jose, CA 95129

Name of Program: RAGS to RICHES" Receivables

Publisher: Amiga

Program Type: Productivity

Application: Accounting (accounts receivable)

Target Audience: Small business

Description: The accounts receivable program handles up to 5,000 customers/10,000 transactions and is RAM-based to function twice as fast as any other accounting package. A CALC function simplifies calculating discounts, taxes, surcharges. Can stand-alone or be integrated with ledger, payables, sales modules. On-screen help menus and an editor for long memos on customers and transactions are available. Instant on-screen summaries. RAM-fast search for customer name or customer number.

- more -

AMIGA HARDWARE

Manufacturer: Tecmar

Address: 6225 Cochran Rd., Solon, Ohio 44139

Product Name: T-Tape™

Description: This product is a 20 Mbyte tape back-up for a hard disk It
drive. It comes as a stand alone unit with its own power
supply. T-Tape can be linked to an Amiga through a
floppy interface port. The device's light panel gives
readouts on track number, tape direction, read/write
status and power.

Availability: Upon Amiga introduction
